[1] 2021 and 2016 population

Statistics Canada is committed to protect the privacy of all Canadians and the confidentiality of the data they provide to us. As part of this commitment some population counts of geographic areas are adjusted in order to ensure confidentiality.

The adjustment to counts of the total population for any dissemination block is controlled to ensure that the population counts for dissemination areas will always be within 5 of the actual values. The adjustment has no impact on the population counts of census divisions and large census subdivisions.

[2] Total private dwellings

Private dwelling refers to a separate set of living quarters with a private entrance either from outside the building or from a common hall lobby vestibule or stairway inside the building. The entrance to the dwelling must be one that can be used without passing through the living quarters of some other person or group of persons.

[3] Private dwellings occupied by usual residents

A private dwelling occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing.

Also included are private dwellings whose usual residents are temporarily absent on May 11 2021.

[4] The category 'Movable dwelling' includes mobile homes and other movable dwellings such as houseboats recreational vehicles†and railroad cars.

[5] A census family is defined as a married couple (with or without children) a common-law couple (with or without children) or a one-parent family. For more information refer to the†Census Dictionary: Census family structure.

[6] There is no age restriction on children. Includes children living with a grandparent or grandparents without a parent present.

[7] Includes foster children.

[8] Multigenerational households represent all households where there is at least one person who is both the grandparent of a person in the household and the parent of another person in the same household. They also represent all households where there is at least one person who is both the child of a person in the household and the grandchild of another person in the same household. In previous censuses multigenerational households were only created based on the former definition not the latter. As a result there may be small differences in counts for 2011 and 2016 in archived tables.

[9] Excludes multigenerational households.

After-tax income - Total income less income taxes of the statistical unit during a specified reference period.

Income taxes refers to the sum of federal income taxes provincial and territorial income taxes less abatement where applicable. Provincial and territorial income taxes include health care premiums in certain jurisdictions. Abatement reduces the federal income taxes payable by persons residing in Quebec or in certain self-governing Yukon First Nation settlement lands.

For the 2021 Census the reference period for income data is the calendar year 2020 unless otherwise specified.

Median income - The median income of a specified group is the amount that divides the income distribution of that group into two halves i.e. the incomes of half of the units in that group are below the median while those of the other half are above the median. Median incomes of households are calculated for all units whether or not they had income.

[27] Total income - The sum of certain incomes (in cash and in some circumstances in kind) of the statistical unit during a specified reference period. The components used to calculate total income vary between:

*statistical units of social statistical programs such as persons private households census families and economic families

*statistical units of business statistical programs such as enterprises companies establishments and locations

*statistical units of farm statistical programs such as farm operator and farm family.

In the context of persons total income refers to receipts from certain sources before income taxes and deductions during a specified reference period.

In the context of census families total income refers to receipts from certain sources of all of its family members before income taxes and deductions during a specified reference period.

In the context of economic families total income refers to receipts from certain sources of all of its family members before income taxes and deductions during a specified reference period.

In the context of households total income refers to receipts from certain sources of all household members before income taxes and deductions during a specified reference period.

The monetary receipts included are those that tend to be of a regular and recurring nature. Receipts that are included as income are:

*employment income from wages salaries tips commissions and net income from self-employment (for both unincorporated farm and non-farm activities)

*income from investment sources such as dividends and interest on bonds accounts guaranteed investment certificates (GICs) and mutual funds

*income from employer and personal pension sources such as private pensions and payments from annuities and registered retirement income funds (RRIFs)

*other regular cash income such as child support payments received spousal support payments (alimony) received and scholarships

*income from government sources such as social assistance child benefits Employment Insurance benefits Old Age Security benefits COVID-19 benefits and Canada Pension Plan and Québec Pension Plan benefits and disability income.

Receipts excluded from this income definition are:

*one-time receipts such as lottery winnings gambling winnings cash inheritances lump-sum insurance settlements and tax-free savings account (TFSA) or registered retirement savings plan (RRSP) withdrawals

*capital gains because they are not by their nature regular and recurring. It is further assumed that they are more relevant to the concept of wealth than the concept of income

*employers' contributions to registered pension plans Canada Pension Plan Québec Pension Plan and Employment Insurance

*voluntary inter-household transfers imputed rent goods and services produced for barter and goods produced for own consumption.

After-tax income - Total income less income taxes of the statistical unit during a specified reference period.

Income taxes refers to the sum of federal income taxes provincial and territorial income taxes less abatement where applicable. Median incomes of persons not in families are calculated for all units whether or not they had income.

[30] Calculation includes persons not in economic families without income (with an income of zero).

[31] Total income - The sum of certain incomes (in cash and in some circumstances in kind) of the statistical unit during a specified reference period. The components used to calculate total income vary between:

*statistical units of social statistical programs such as persons private households census families and economic families
*statistical units of business statistical programs such as enterprises companies establishments and locations

Average income - Average income of a specified group is calculated by dividing the aggregate income of that group by the number of units in that group. Average incomes of persons not in families are calculated for all units whether or not they had income.

[33] Low-income status - The income situation of the statistical unit in relation to a specific low-income line in a reference year.

Statistical units with income that is below the low-income line are considered to be in low income.

For the 2021 Census the reference period for income data is the calendar year 2020 unless otherwise specified.

Prior to the 2021 Census the LIM thresholds and the LIM low income statistics were derived and reported for the population residing outside of the territories and off reserve only. It was based on the consideration that the income prices and expenditure patterns could be quite different in the territories and on reserve and thus could make the interpretation of the LIM low-income statistics difficult.

Since the 2016 Census there were research studies that analyzed the feasibility of defining LIM thresholds that include the population living in the territories and on reserve and examined the aspects that should be considered when interpreting low-income statistics based on this definition. With the guidance and support of such research the 2021 Census expanded the coverage of the LIM concept to all regions in Canada making it the only low-income concept that is applicable to the population living in the territories and on reserve.

Low-income measure after tax (LIM-AT) - The Low-income measure after tax refers to a fixed percentage (50%) of median-adjusted after-tax income of private households. The household after-tax income is adjusted by an equivalence scale to take economies of scale into account. This adjustment for different household sizes reflects the fact that a household's needs increase but at a decreasing rate as the number of members increases.

Using data from the 2021 Census of Population the line applicable to a household is defined as half the Canadian median of the adjusted household after-tax income multiplied by the square root of household size. The median is determined based on all persons in private households where low-income concepts are applicable. Thresholds for specific household sizes are presented in Table 2.4 Low-income measures thresholds (LIM-AT and LIM-BT) for private households of Canada 2020 Dictionary Census of Population 2021.

When the unadjusted after-tax income of household pertaining to a person falls below the threshold applicable to the person based on household size the person is considered to be in low income according to LIM-AT. Since the LIM-AT threshold and household income are unique within each household low-income status based on LIM-AT can also be reported for households.

Low-income cut-offs after tax (LICO-AT) - The Low-income cut-offs after tax refers to an income threshold defined using 1992 expenditure data below which economic families or persons not in economic families would likely have devoted a larger share of their after-tax income than average to the necessities of food shelter and clothing. More specifically the thresholds represented income levels at which these families or persons were expected to spend 20 percentage points or more of their after-tax income than average on food shelter and clothing. These thresholds have been adjusted to current dollars using the all-items Consumer Price Index (CPI).

The LICO-AT has 35 cut-offs varying by seven family sizes and five different sizes of area of residence to account for economies of scale and potential differences in cost of living in communities of different sizes. These thresholds are presented in Table 2.5 Low-income cut-offs after tax (LICO-AT - 1992 base) for economic families and persons not in economic families 2020 Dictionary Census of Population 2021.

When the after-tax income of an economic family member or a person not in an economic family falls below the threshold applicable to the person the person is considered to be in low income according to LICO-AT. Since the LICO-AT threshold and family income are unique within each economic family low-income status based on LICO-AT can also be reported for economic families.

Prevalence of low income - The proportion or percentage of units whose income falls below a specified low-income line.

[34] Economic family after-tax income decile group - The economic family income decile group provides a rough ranking of the economic situation of a person based on his or her relative position in the Canadian distribution of the adjusted after-tax income of economic families for all persons in private households.

Using data from the 2021 Census of Population the population in private households is sorted according to its adjusted after-tax family income and then divided into 10 equal groups each containing 10% of the population. The decile cut-points are the levels of adjusted after-tax family income that define the 10 groups.

For the 2021 Census the reference period for income data is the calendar year 2020 unless otherwise specified.

[35] The Gini coefficient or Gini index is a measure of inequality that indicates how equally income is distributed for a given population. It measures how much an income distribution deviates from perfect equality. Values of the Gini coefficient can range from 0 to 1. A value of 0 indicates that income is equally divided among the population with all units receiving exactly the same amount of income. At the opposite extreme a Gini coefficient of 1 denotes a perfectly unequal distribution where one unit has all of the income in the economy.

For the census Gini coefficients are calculated for three types of adjusted household income—market income, total income and after tax income. Adjusted income is computed by dividing the household income by a factor equal to the square root of the household size (known as the equivalence scale). This adjustment for different household sizes takes into account economies of scale. It reflects the fact that the needs of a household increase but at a decreasing rate as the number of members increases.

The P90/P10 ratio is a measure of inequality. It is the ratio of the 90th and the 10th percentile of the adjusted household after-tax income. The 90th percentile means 90% of the population has income that falls below this threshold. The 10th percentile means 10% of the population has income that falls below this threshold.

[36] Knowledge of official languages†refers to whether the person can conduct a conversation in English only, French only, in both or in neither language. For a child who has not yet learned to speak, this includes languages that the child is learning to speak at home.

For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2021.

[37] First official language spoken†refers to the first official language (English or French) spoken by the person.

For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2021.

[38] Mother tongue refers to the first language learned at home in childhood and still understood by the person at the time the data was collected. If the person no longer understands the first language learned, the mother tongue is the second language learned. For a person who learned more than one language at the same time in early childhood, the mother tongue is the language this person spoke most often at home before starting school. The person has more than one mother tongue only if they learned these languages at the same time and still understands them. For a child who has not yet learned to speak, the mother tongue is the language spoken most often to this child at home. A child who has not yet learned to speak has more than one mother tongue only if these languages are spoken to them equally often so that the child learns these languages at the same time.

For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2021.

[39] Users should be aware that estimates associated with Indigenous languages are more affected than most by the incomplete enumeration of certain reserves and settlements in the Census of Population.

[40] All languages spoken at home†refers to all languages that the person speaks at home on a regular basis at the time of data collection. n.i.e. = not included elsewhere

n.o.s. = not otherwise specified

For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2021.

[41] Language spoken most often at home refers to the language the person speaks most often at home at the time of data collection. A person can report more than one language as "spoken most often at home" if the languages are spoken equally often.

For a person who lives alone, the language spoken most often at home is the language in which they feel most comfortable. For a child who has not yet learned to speak, this is the language spoken most often to the child at home. Where more than one language is spoken to the child, the language spoken most often at home is the language spoken most often.

If more than one language is spoken equally often to the child, then these languages are included here.

[42] Other language(s) spoken regularly at home†refers to the language(s) if any that the person speaks at home on a regular basis at the time of data collection, other than the language(s) they speak most often at home.

Comparisons to previous Census data is not recommended for the 'Other languages spoken regularly at home' variable.

For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2021.

[43] Knowledge of official languages†refers to whether the person can conduct a conversation in English only, French only, in both or in neither language. For a child who has not yet learned to speak, this includes languages that the child is learning to speak at home.

Knowledge of non-official languages†refers to whether the person can conduct a conversation in a language other than English or French. For a child who has not yet learned to speak, this includes languages that the child is learning to speak at home. The number of languages that can be reported may vary between surveys, depending on the objectives of the survey.

[45] This category includes persons who identify as First Nations (North American Indian) Métis and/or Inuk (Inuit) and/or those who report being Registered or Treaty Indians (that is registered under the Indian Act of Canada) and/or those who report having membership in a First Nation or Indian band.

[46] This category includes persons who identify as only one Indigenous group that is First Nations (North American Indian) Métis or Inuk (Inuit).

[47] This category includes persons who identify as any two or all three of the following: First Nations (North American Indian) Métis and/or Inuk (Inuit).

[48] This category includes persons who do not identify as First Nations (North American Indian) Métis or Inuk (Inuit) but who report having Registered or Treaty Indian status and/or Membership in a First Nation or Indian band.

[49] Registered or Treaty Indian status[†] refers to whether or not a person is a Registered or Treaty Indian. Registered Indians are persons who are registered under the Indian Act of Canada. Treaty Indians are persons who belong to a First Nation or Indian band that signed a treaty with the Crown. Registered or Treaty Indians are sometimes also called Status Indians.

[50] Tenure refers to whether the household owns or rents their private dwelling. The private dwelling may be situated on rented or leased land or be part of a condominium. A household is considered to own their dwelling if some member of the household owns the dwelling even if it is not fully paid for for example if there is a mortgage or some other claim on it. A household is considered to rent their dwelling if no member of the household owns the dwelling. A household is considered to rent that dwelling even if the dwelling is provided without cash rent or at a reduced rent or if the dwelling is part of a cooperative.

For historical and statutory reasons shelter occupancy on Indian reserves or settlements does not lend itself to the usual classification by standard tenure categories. Therefore a special category 'dwelling provided by the local government First Nation or Indian band' has been created for census purposes.

[51] Condominium status refers to whether the private dwelling is part of a condominium development. A condominium is a residential complex in which dwellings are owned individually while land and common elements are held in joint ownership with others.

[52] Bedrooms refers to rooms in a private dwelling that are designed mainly for sleeping purposes even if they are now used for other purposes such as guest rooms and television rooms. Also included are rooms used as bedrooms now even if they were not originally built as bedrooms such as bedrooms in a finished basement. Bedrooms exclude rooms designed for another use during the day such as dining rooms and living rooms even if they may be used for sleeping purposes at night. By definition one-room private dwellings such as bachelor or studio apartments have zero bedrooms.

[53] Rooms refers to enclosed areas within a private dwelling which are finished and suitable for year round living. The number of rooms in a private dwelling includes kitchens bedrooms and finished rooms in the attic or basement. The number of rooms in a private dwelling excludes bathrooms halls vestibules and rooms used solely for business purposes. Partially divided rooms are considered to be separate rooms if they are considered as such by the respondent (e.g. L-shaped dining-room and living-room arrangements).

[54] Number of persons per room - Refers to an indicator of the level of crowding in a private dwelling. It is calculated by dividing the number of persons in the household by the number of rooms in the dwelling.

[55] Housing suitability refers to whether a private household is living in suitable accommodations according to the National Occupancy Standard (NOS)

'Housing suitability' assesses the required number of bedrooms for a household based on the age sex and relationships among household members. An alternative variable 'persons per room' considers all rooms in a private dwelling and the number of household members.

Housing suitability and the National Occupancy Standard (NOS) on which it is based were developed by Canada Mortgage and Housing Corporation (CMHC) through consultations with provincial housing agencies.

[56] Period of construction refers to the period in time during which the building or dwelling was originally constructed.

This refers to the period in which the building was completed not the time of any later remodeling additions or conversions.

For properties having multiple residential structures this refers to the period in which the most recent structure was completed.

[57] Includes data up to May 11 2021.

[58] Dwelling condition refers to whether the dwelling is in need of repairs. This does not include desirable remodelling or additions.

[59] Refers to whether or not a person residing in the household is responsible for paying the rent or the mortgage or the taxes or the electricity or other services or utilities. Where a number of people may contribute to the payments more than one person in the household may be identified as a household maintainer. If no person in the household is identified as making such payments the reference person is identified by default.

[60] Primary household maintainer - The first person in the household identified as someone who pays the rent or the mortgage or the taxes or the electricity or other services or utilities for the dwelling. When more than one member of the household contributes to the payments the first person listed is chosen as the primary household maintainer.

If no person in the household is identified as making any such payments the first person listed is selected by default.

The order of the persons in a household is determined by the order in which they are listed on the questionnaire. Generally an adult is listed first followed if applicable by their spouse or common-law partner and then by their children. The order does not necessarily correspond to the proportion of household payments made by each person.

[61] Shelter-cost-to-income ratio - Refers to the proportion of average total income of household which is spent on shelter costs.

Shelter-cost-to-income ratio is calculated for private households who reported a total household income greater than zero.

Private households located on an agricultural operation that is operated by a member of the household and households who reported a zero or negative total household income are excluded.

The relatively high shelter-costs-to-household income ratios for some households may have resulted from the difference in the reference period for shelter costs and household total income data. The reference period for shelter cost data is 2021 while household total income is reported for the year 2020. As well for some households the 2020 household total income may represent income for only part of a year.

For more information on household total income or shelter costs refer to the Census Dictionary: Total income and Shelter cost.

[62] Acceptable housing refers to whether a household meets each of the three indicator thresholds established by the Canada Mortgage and Housing Corporation for housing adequacy suitability and affordability. Housing indicator thresholds are defined as follows:

*Adequate housing is reported by their residents as not requiring any major repairs.

*Affordable housing has shelter costs equal to less than 30% of total before-tax household income.

*Suitable housing has enough bedrooms for the size and composition of resident households according to the National Occupancy Standard (NOS) conceived by the Canada Mortgage and Housing Corporation and provincial and territorial representatives.

Acceptable housing identifies which thresholds the household falls below if any. Housing that is adequate in condition suitable in size and affordable is considered to be acceptable.

Households below and above the thresholds are based on the indicators for which individual households can be assessed. Farm and on-reserve households whose housing does not meet either or both of the suitability and adequacy thresholds are counted in the total of households below the thresholds. Farm and on-reserve households who live in housing that meets both the suitability and adequacy thresholds are counted in the total of households above the thresholds (even though it is not possible to assess housing affordability for these households). Farm households and on-reserve households cannot be assessed for housing affordability because the concept is not applicable.

Housing affordability is assessed for owner and tenant households with household total income greater than zero in non-farm non-reserve private dwellings.

[63] Core housing need refers to whether a private household's housing falls below at least one of the indicator thresholds for housing adequacy affordability or suitability and would have to spend 30% or more of its total before-tax income to pay the median rent of alternative local housing that is acceptable (attains all three housing indicator thresholds). Housing indicator thresholds are defined as follows: Adequate housing is reported by their residents as not requiring any major repairs. Affordable housing has shelter costs equal to less than 30% of total before-tax household income. Suitable housing has enough bedrooms for the size and composition of resident households according to the National Occupancy Standard (NOS) conceived by the Canada Mortgage and Housing Corporation and provincial and territorial representatives. Only private non-farm non-reserve and owner- or renter-households with incomes greater than zero and shelter-cost-to-income ratios less than 100% are assessed for 'core housing need.' Non-family households with at least one maintainer aged 15 to 29 attending school are considered not to be in 'core housing need' regardless of their housing circumstances. Attending school is considered a transitional phase and low incomes earned by student households are viewed as being a temporary condition.

[64] Presence of mortgage payments refers to whether an owner household makes regular mortgage or loan payments for their dwelling.

[65] Shelter cost refers to the average monthly total of all shelter expenses paid by households.

Shelter costs for owner households include where applicable mortgage payments property taxes and condominium fees along with the costs of electricity heat water and other municipal services. For renter households shelter costs include where applicable the rent and the costs of electricity heat water and other municipal services. For households living in a dwelling provided by the local government First Nation or Indian band shelter costs include where applicable the monthly use or occupancy payment and the costs of electricity heat water and other municipal services.

[66] Value (owner estimated) refers to the dollar amount expected by the owner if the asset were to be sold.

In the context of dwelling it refers to the value of the entire dwelling including the value of the land it is on and of any other structure such as a garage which is on the property. If the dwelling is located in a building which contains several dwellings or a combination of residential and business premises all of which the household owns the value is estimated as a portion of the market value that applies only to the dwelling in which the household resides.

[67] Subsidized housing refers to whether a renter household lives in a dwelling that is subsidized. Subsidized housing includes rent geared to income social housing public housing government-assisted housing non-profit housing rent supplements and housing allowances.

[68] Indigenous ancestry' refers to whether a person has ancestry associated with the Indigenous peoples of Canada that is First Nations (North American Indian) Métis and/or Inuit. Aboriginal peoples (referred to here as Indigenous peoples) of Canada are defined in the Constitution Act 1982 Section 35 (2) as including the Indian Inuit and Métis peoples of Canada. The term 'Aboriginal' has been replaced with the updated term of 'Indigenous' when referring to individuals who identify themselves as First Nations people Métis and/or Inuit. Ancestry refers to the ethnic or cultural origins of the person's ancestors an ancestor being usually more distant than a grandparent. A person can have more than one ethnic or cultural origin.

Users should be aware that the estimates associated with this variable are more affected than most by the incomplete enumeration of certain reserves and settlements in the Census of Population.

For more information on Indigenous variables including information on their classifications the questions from which they are derived data quality and their comparability with other sources of data please refer to the Indigenous Peoples Reference Guide Census of Population 2021 and the Indigenous Peoples Technical Report Census of Population 2021.
