Others	93.2	37.1	79.9	43.5	63.2	59.5

NOTES

^a These analyses were conducted taking all 14 communities into account, even though Inuit midwives are present only in Kuujjuaq, Salluit, Puvirnituq and Inukjuak.

1. Statistically significant difference observed using the 5% threshold compared to the other group.

2. Statistically significant difference observed using the 5% threshold compared to both groups.

* The coefficient of variation is greater than 15% and lower than or equal to 25%. The proportion should be interpreted carefully.

** The coefficient of variation is greater than 25%. The proportion is shown for information only.

NP: This value is not presented since some categories have less than 5 respondents.
