Foreword

The purpose of *Nunavik in Figures 2020* is to disseminate as easily and broadly as possible key statistical data on the northernmost region of Québec. The publication is a summary socioeconomic portrait of the population and living conditions. Its data is extracted in large part from the Nunivaat databank, a core component of the Nunavik Statistics Program. The Program was created in 2005 at the request of the Kativik Regional Government to document the demographic, social and economic situation in Nunavik, as well as related trends and priority issues.

The sources of the data presented in *Nunavik in Figures 2020* are mainly Statistics Canada, the Institut de la statistique du Québec and a few Nunavik organizations. Some data represents original research performed by Nunivaat. The data appearing in *Nunavik in Figures 2020* was up-to-date at the time of publication. Most of the data is also available in table format on the Nunivaat website.

This publication complements *Nunavik in Figures 2020*. It provides the sources used to generate each table of data. In order to improve readability, these sources were not included in *Nunavik in Figures 2020*. They are presented in this publication for reference purposes. The table numbers appearing in *Nunavik in Figures 2020* are used in this publication to identify the corresponding sources for each table.

Nunavik in Figures 2020 is published in an Inuktitut–English version and an Inuktitut–French version. Printed copies may be obtained from Nunivaat or the Kativik Regional Government. The full versions may also be viewed or downloaded from www.nunivaat.org.
