Footnotes:

[1] Age

'Age' refers to the age of a person (or subject) of interest at last birthday (or relative to a specified, well-defined reference date).

[2] Gender

Gender refers to an individual's personal and social identity as a man, woman or non-binary person (a person who is not exclusively a man or a woman).

Gender includes the following concepts: gender identity, which refers to the gender that a person feels internally and individually

[3] Given that the non-binary population is small, data aggregation to a two-category gender variable is sometimes necessary to protect the confidentiality of responses provided. In these cases, individuals in the category "non-binary persons" are distributed into the other two gender categories and are denoted by the "+" symbol.

[4] Highest certificate, diploma or degree

Highest certificate, diploma or degree is the classification used in the census to measure the broader concept of '<http://www23.statcan.gc.ca/imdb/p3Var.pl?Function=DEC&am>

[5] Major field of study (based on the Classification of Instructional Programs (CIP) Canada 2021)

Field of study refers to the discipline or area of learning or training associated with a particular course or program of study. This 'Major field of study' variable refers to the predominant discipline or area of learning or training of a person's highest completed postsecondary certificate, diploma or degree, classified according to the Classification of Instructional Programs (CIP) Canada 2021. This variable can be used either independently or in conjunction with the 'Highest certificate, diploma or degree' variable. When the latter is used with 'Major field of study,' it should be noted that different fields of study will be more common for different types of postsecondary qualifications. At the detailed program level, some programs are only offered at certain levels of education. There was an explicit instruction in the questionnaire which instructed respondents to be as specific as possible in indicating a subfield or subcategory of specialization within a broad discipline or area of training. This variable is reported for persons aged 15 years and over in private households.

[6] For information on data quality for this variable, refer to the Education Reference Guide, Census of Population, 2021, Catalogue no. 98-500-X2021013.

[7] 'Non-apprenticeship trades certificate or diploma' includes trades certificates or diplomas such as pre-employment or vocational certificates and diplomas from brief trade programs completed at colleges, institutes of technology, vocational centres and similar institutions. It also includes qualifications from vocational training programs in the province of Quebec such as the Diplôme d'études professionnelles (DEP)/Diploma of Vocational Studies (DVS).

[8] 'Apprenticeship certificate' includes Certificates of Apprenticeship, Certificates of Qualification and Journeyperson's designations.

[9] College, CEGEP and other non-university certificates and diplomas obtained from programs that are typically completed in less than 3 months are not included in this category.

[10] This variable shows the 'Variant of CIP 2021 - Alternative primary groupings,' with the hierarchy of the primary groupings and two-digit series. When a primary grouping contains more than one subseries from series '30. Multidisciplinary/interdisciplinary studies,' these subseries are grouped together. An exception is made for '30.01 Biological and physical sciences' due to its large size. For more information on the CIP classification, see the Classification of Instructional Programs, Canada 2021. For information on classification and data quality for this variable, refer to the Education Reference Guide, Census of Population, 2021, Catalogue no. 98-500-X2021013.
